TABLE OF CONTENTS FOR "RADIOMETRIC TECHNOLOGY"

Compiled by V. G. Dubenetakiy

This book is a survey of articles which appeared in foreign periodicals during 1941 - 1944. In most chapters the author includes fairly extensive abstracts of leading articles, followed by a list of other articles on the subject with short description of contents.

Among the periodicals (American, British, and German, in the main) surveyed by the author were the following: Electrical Engineering, Electronics, Bell Lab Record, Communications, GE Review, RCA Review, Radio, Science, Science Abstracts (Section B), and Wireless World.

TABLE OF CONTENTS

	Page
Introduction	3
00. General Problems on Radio Engineering Metrology and Testing of Radio Products	3
01. Measuring Methods, Circuits, and Instruments of General Designation	5
02. Measuring Electrical Parameters of Oscillatory Circuits and their Elements: Inductance, Capacitance, and Resistance	10
03. Measuring Electric Parameters of Cables and Lines with Distributed Constants	21
04. Measuring Electric Parameters of Antennas	23
05. Measuring Electric Properties of Dielectrics and Insulating Materials	25

	<u>Page</u>
06. Measuring Currents, Voltages, Power, and Phase Difference	28
07. Measuring Frequencies	42
08. Measuring Small Time Intervals	49
09. Cathode Oscillographs	50
10. Testing Radio Receivers and Amplifiers	55
11. Measuring the Field Intensity of Radio Stations and Radio Noise	57
12. Measuring Modulation	61
13. Measuring Nonlinear Distortions and Analysis of Voltage Forms	65
14. Acoustic and Audio-Frequency Measurements	66
15. Audio Oscillators	67
16. Testing Radio Tubes	69
17. Measuring Ultrahigh Frequencies	70
18. Testing Radio Apparatus with Frequency Modulation	72
19. Measurements During Impulse Radio Transmission	73
20. Devices and Methods for Industrial Control of Radio Products	73
21. Power Supply Sources for Radio Measuring Apparatus and Installations	74
22. Bibliography	75
